## CONSUMPTION,

Its Cure and Its Preventive. BY J. H. SCHENCK, M. D. MANY a human leing has passed away, for whose death there was no other reason than the neglect of known and indispusably proven

means of cure. Those near and dear to family and friends are sleeping the dreamless slumber into which, had they calmly adopted Dr. Joseph H. Schenck's Simple

Treatment and availed themselves of his wonderful efficacious medicines they would not have fallen. Dr. Schenck has in his own case proved that wherever sufficient vitality remains, that vitality, by his medicines and his directions for their

use, is quickened into healt ful vigor. In this statement there is nothing presumptuous. To the faith of the invalid is made no representation that is not a thousand times substantiated by living and visible works. The theory of the cure by Dr. Schenck's medicines is as simple as it is unfailing. Its philosophy requires no argument, It is self-assuring, self-

convincing. The Sea-weed Tonic and Mandrake Pills are the first two weapons with which the citadel of of consumption originate in dyspepsia and a functionally disordered liver. With this condition the br nchial tubes "sympathize" with the stomach. They respond to the morbific action of the liver. Here then comes tife culminating result, and the setting in with all its distressing

Consumption. The Mancrake Pills are composed of one of Nature's noblest gifts-the Podophitium Peliatum. They possess all the blood-searching, alterative properties of calomel, but unlike calo-

"Leave no sting Behind." The work of cure is now bhginring. The vitiated and mucous deposits in the bowels and in the alimentary canal are ejected. The liver like a clock is wound up. It arouses from its torpidity. The stomach acts responsively, and the patient begins to feel that he is getting at

An appetite sets in. Now comes the greatest Blood Purifier ever yet given by an judulgent Father to suffering Schenck's Palmon c Syrup comes in to perform its functions and to hasten and complete the cure. It enters at once upon its work. Nature cannot be cheated. It collects and ripens the impaired and diseased portions of the lungs. In the form of gathering it prepares them for expectoration, and b! in a very short time the malady is vanquished, the rotten throne it occupied is renovated and made new, and the patient, in all the dignity of regained vigor steps forth to enjoy the manhood or womanhood

Given up as Lost.

The second thing is, the patients must stay in a warm room until they get well; it is almost impossible to prevent taking cold when the lungs are diseased, but it must be prevented or a cure cannot be effected. Fresh air and itding out especially in this section of the country in the fall and winter season, are all wrong. Physicians who recommend that course lose their patients, if their lungs are badly diseased. and yet, because they are in the house they | highest prices, at must not sit down quiet; they must walk about the room as much and as fast as the strength will bear to get up a good e:remistion of blood. do with the appetite, and is the great point to

To despair of cure after such evidence of its possibility in the worst cases, and moral certainty in all others, is sinful. Ur. Schenck's personal statement to the Facul y of his own cure was in these modest words :

"Many years ago I was in the last stages of consumption; confined to my bed, and at one time my physicians thought that I could not live a week : then, like a diewning man catching at straws, I heard of and obtained the preparations which I now offer to the public, and they made a perfect cure of me. It seemed to me that I could feel them penetrate my whole system. They soon ripeared the matter in my lungs, and I would spit up more than a pint of offensive yellow matter every morning for a long

"As soon as that began to subside,my cough, fever, pain and night sweats all began to leave me, and my appetite became so great that it was with great difficulty that I could keep from eating to much. I soon gained my strength and have grown in flesh ever since.

"I was weighed shortly after my recovery, added the Doctor,"then looking like a mere skeletor, my weight was only ninety-seven rounds; my present weight is two bundred and twentyfive (225) pounds. And yet for years have enjoyed uninterrupt d health.

Dr. Schenck has discontinued his professional visits to New York and Boston. He or his son Dr. J. H. Schenck, Jr., still continue to see patients at their office, P.o. 15 North Sath street, Philadelphia, every Sa urday from 9 A. M. to 3 P. M. Those who wish a thorough examina-Persons wishing to Insure have now a fa- tion with the Respirometer will be charged \$5,00. The Respirometer declares the exact condition of the lungs, and patients can readily

learn whether they are curable or not. The sirrctions for taking the medicines are adapted to the intelligence even of a child. Follow these directions and kind Nature will do the rest, excepting that in some cases the Mandrake Pills are to be taken in increased doses; the three medicines need no other accompaniments than the ample instructions that accompany When it comes as it will come, let the despairing at once be of good cheer.
